Adjunct Instructor – Social Sciences/Natural Sciences
Art Academy of Cincinnati, Department of Liberal Arts

Position Description:

Liberal Arts Adjunct Instructor responsibilities include: teaching BFA degree courses in Social Sciences and Natural Science, including Astronomy, Zoology, Biology, Chemistry, Physics, Sociology, Archeology, Economics, Political Science, etc., part-time, during afternoon and evening classes.

Adjunct Instructors require a Master’s degree, and teaching experience, with an ability to tailor their subject matter to the artistic process.

AAC Department of Liberal Arts Philosophy:
The Department of Liberal Arts at the Art Academy of Cincinnati seeks to provide unique, evocative and compelling Liberal Arts courses, which emphasize the artfulness in history, critical thinking, the natural and social sciences, and the humanities. Through reading and writing, discussion and critical analysis, and collaborative, electrical reactivity, such courses help expand the possibilities for applying creative problem-solving in any context and in ways which are radically imaginative and visionary. We want AAC graduates to change art, make a difference, change the world.

For this to happen, art needs to evolve beyond the walls and pedestals of galleries and museums, but also beyond the spot illustrations and package design of more commercial applications. This requires seeing the potential for creative modalities and beauty in every aspect of one’s life. The AAC’s Department of Liberal Arts recognizes this and strives to provide students with the resources for seeing the world in their art and their art in the world. Thus, Liberal Arts courses are not in addition to a student’s study of art and design, they are an integral extension of it. The Liberal arts, it seems, are arts after all.

Nothing is off limits, nothing is impossible. The goal is to live as artfully and variously and meaningfully as possible. Whether our students ultimately pursue careers in illustration, community planning, arts administration, cocktail invention, rocket ship design, or law enforcement, creativity and artistic problem-solving will always be the hottest commodity, and being able to connect and apply that in a variety of contexts will make all the difference, not only for the students themselves, but in all the lives they touch.

For consideration, and to be added to the AAC pool of part-time Adjunct Instructors, interested candidates should send a cover letter and CV to jobs@artacademy.edu.
